

IN THE CLAIMS

Please amend claims 23 and 28, and cancel claim 26 as follows:

- 1-22. (Canceled)
23. (Currently amended) A garment ~~composed of~~ comprising an outer side, an inner side, and an infrared-reflecting material, said infrared-reflecting material comprising ~~at least one~~ a metalized water-vapor-permeable ply having a top surface which faces the outer side and a bottom surface, and ~~an at least one~~ air permeable, drapable and convective ply having a three-dimensionally transmissive structure, wherein the convective ply is disposed atop the top surface ~~on one or more of the surfaces of the~~ metalized ply which faces the outer side of the garment.
24. (Previously presented) The garment according to claim 23 wherein the convective ply has a top surface and an air-permeable sheetlike structure is disposed on this surface.
25. (Previously presented) The garment according to claim 23 wherein an air-permeable sheetlike structure is a constituent part of the convective ply and itself forms the top surface of the convective ply .
26. (Canceled)
27. (Previously presented) The garment according to claim 23 wherein the convective ply is not less than 2 mm in thickness.
28. (Currently amended) The garment according to claim 23 wherein the convective ply has a structure that is riblike, honeycomblke, pimpled, netlike, deflocked, or foamlike.
29. (Previously presented) The garment according to claim 23 wherein the

convective ply comprises spacers perpendicular to one or more of the surfaces of the metallized ply.

30. (Previously presented) The garment according to claim 23 wherein the convective ply is a three-dimensional pimpled formed-loop knit.
31. (Previously presented) The garment according to claim 23 wherein the convective ply is selected from the group of materials comprising polypropylene, polyester, polyurethane, polyethylene, polyamide and combinations thereof.
32. (Previously presented) The garment according to claim 23 wherein the convective ply has an air permeability in the z direction of not less than $100 \text{ l/m}^2\text{s}$ at a pressure of 10 Pa.
33. (Previously presented) The material according to claim 23 wherein the convective ply has an air permeability in the x and y directions of not less than $50 \text{ l/m}^2\text{s}$ at a pressure of 10 Pa.
34. (Previously presented) The garment according to claim 24 and 25 wherein the sheetlike structure has an air permeability of not less than $50 \text{ l/m}^2\text{s}$ at a pressure of 10 Pa.
35. (Previously presented) The garment according to claim 23 wherein the metallized ply comprises a metallized textile.
36. (Previously presented) The garment according to claim 23 wherein the metallized ply comprises a metallized membrane.
- 37-39. (Canceled)
